Gyanmandir Secondary English School

Kathmandu

PROJECT

Student Management System

github.com/sushankpp/Student-management-system

This project student data, stores it in a database, and allows for updating and deleting records to assist with other administrative tasks. The project was created using HTML, CSS, JavaScript, PHP and MySql without using any framework.

Symphonia - A web music app

github.com/sushankpp/Symphonia.git , https://github.com/sushankpp/SymphoniaBackend.git

A full-stack music optimization web app where users can upload audio files that are automatically transcoded using FFmpeg's AAC codec, reducing file sizes while preserving quality. Backend built with Laravel to handle user authentication, role management, and audio metadata storage.

Cinematra - Video Streaming Site

github.com/sushankpp/Cinematra-Go.git, https://github.com/sushankpp/Cinematra-next.git

Full-stack video streaming platform (Next.js, TypeScript, Go/Fiber, PostgreSQL) featuring adaptive bitrate streaming, ML-based content moderation, and a TF-IDF/cosine-similarity recommendation engine.
